***Examiner's Statement of Reasons for Allowance***

1. Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance: The instant invention claims describe a visiting location register (or VLR) which generates a temporary authentication identity applicable only in the cell when a mobile terminal is successful authentication for data communication via a wireless telephony network and transmits the temporary authentication identity to the mobile terminal and in a wireless local area network (or WLAN) located in the cell receives the temporary authentication identity from the wireless telephony network before the mobile terminal associates with the access point located in the WLAN and authenticates the mobile terminal by matching the temporary authentication identity for data communication via the WLAN. The closest prior art, Verma et al. (US 7,065,358) requires receiving in the WLAN from the mobile terminal identity previously used by the mobile wireless terminal to access the wireless telephony network and forwarding the identity information of the mobile wireless terminal to the last accessed serving node. Hence, the instant claims require the WLAN receiving the temporary authentication identity from the wireless telephony network before the mobile terminal associates the access point.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Koster, US 6,259,914, discloses a method and apparatus for implementing international wireless roaming.

Gallagher et al., US 2005/0266853, discloses a handover message in an unlicensed mobile access telecommunication system.

Zivkovic, US 2006/0068788, discloses a transfer of service session with a mobile from a first wireless local area network to one of its neighbors.

Christoffel et al., US 2002/0136226, discloses a method and system for enabling seamless roaming of mobile devices among wireless network.

Chinnaswamy et al., US 2005/0114680 discloses a method and system for providing SIM-based roaming.
